NEW HUNGARIAN TECHNICAL UNIVERSITY; REVISED EXAMINATION SYSTEM

DISCUSSES MATYAS RAKOSI TECHNICAL UNIVERSITY OF HEAVY INDUSTRY -- Budapest,
 Estd Budapest, 11 Dec 52

The Matyas Rakosi Technical University of Heavy Industry is being built
 in the Dudujka Valley near Miskolc, between Miskolc and Hejocsaba.

One classroom building, 250 meters long and three stories high, has been
 completed except for the plastering. Five lecture rooms and the auditorium,
 which seats 500 students, are already in use. When completed, this building
 will have 150 study halls with 20-25 drawing tables in each. It will also
 house a large chemical laboratory. A six-story main building will be erected
 50-60 meters from this classroom building.

The university will have six dormitories, five of which are partially
 completed and already in use. Each dormitory will house 300 students, with
 four to six students sharing a room.

An athletic field and a swimming pool will be built on the other side of
 the railroad tracks. The completed university will have a shopping center,
 workshops, its own power plant, and private houses for the faculty.

By the end of 1954, 2,500 students will be attending the university.

REVISE EXAMINATION PROCEDURE -- Budapest, Nepszava, 8 Jan 53.

Beginning with the new school year, Hungarian students will be given
 a standard state examination on the completion of their studies. Based on
 Soviet procedure, the new system replaces the former Hungarian practice which
 required students to take both semester and comprehensive tests.

The examination of students at technical universities will consist of in-
 dependently solving a problem in engineering. Other university students will
 take the standard state examination.
